

# ELISHA REIGN MIER

*Aspiring Software Developer*

## SUMMARY

Highly-driven information technology student with growing knowledge in web developing, interested in both front-end and back-end development. I am also interested in creating user-friendly and visually appealing user interfaces. In the design aspect, I utilize Figma for creating user interfaces and visual designs. For my technical skills, I have experience with multiple programming languages, including Python and C# for back-end development, as well as HTML, CSS, and JavaScript for front-end development.
